**Subject: Update – Water Supply on Lapatrie Supply Scheme Remains Constrained**

Magalies Water hereby informs consumers that following a service interruption notice issued on the 24<sup>th</sup> of October 2022, on envisaged water supply interruptions on the Lapatrie Supply Scheme, bulk water supply remains constrained. The reported pump breakdown at plant 2D pumpstation remains unresolved. Magalies Water has sought the services of the pump manufacturers to complete an investigation which will determine the cause of the breakdown as well as resolving the non-functionality of the pump.

While technicians are working with the necessary speed to recommission the pump in order to improve on bulk water supply, at this stage no restoration time of services is available. Further updates will be communicated, and consumers are urged to use water sparingly during this period, in order to prevent prolonged water supply interruptions.

We apologize for the inconvenience that this may cause.
