

## **Water Supply Interruptions**

### **Mahikeng Local Municipality**

**Saturday, 29<sup>th</sup> April 2023**

**Subject: Water Supply Interruptions on Mahikeng Water Treatment Plant, Owing to  
Electricity Supply Outages in Parts of Mahikeng**

Magalies Water hereby informs residents, receiving water supply from the Mahikeng Water Treatment Plant, that plant operations have been suspended. This is as a result of incident at the Mahikeng main substation, which supplies Water Treatment Plant with electricity, where substation panels have been reported to have been burnt.

Consequently, operations at the Mahikeng Water Treatment Plant will remain suspended until the challenges of electricity supply have been resolved. Information available at this stage indicates that, resumption of electricity supply is envisaged to be in three days after Eskom would have complete repairs to the main substation. During this period, some areas within the Mahikeng Local Municipality jurisdiction, will experience water supply interruptions.

We urge communities to use water sparingly during this period in order to prevent prolonged water supply interruptions. Magalies Water apologizes for the inconvenience that this may cause and will communicate further updates in due course.
