

Water Supply Interruptions

Moses Kotane and Thabazimbi Local Municipalities

Monday, 1st May 2023

Subject: Water Supply Interruptions on Lapatrie Northern Scheme Due to Low Command Reservoir Levels

Magalies Water hereby informs customers receiving water supply from the Lapatrie Northern Scheme of imminent water supply interruptions. This due to receipt of high voltage electricity supply to the water pumps, which have been causing recurring power supply trips, on the numerous pumps within the system.

This has regrettably affected our water levels at the command reservoirs. Current water levels have reached low levels, which will force Magalies Water to implement water demand management. Given the current high-water demand by consumers, this is a necessary action in stabilizing the scheme, given then current situation.

The following customers may experience, water supply interruptions during this period:

- Moses Kotane Local Municipality
- Thabazimbi Local Municipality
- Mines operating in the above areas

We urge consumers to use water sparingly during this period in order to prevent prolonged water supply interruptions. Magalies Water apologizes for the inconvenience that this may cause and will communicate further updates in due course.
