

URGENT NOTICE

Water Supply Interruptions

Sunday, 04th February 2024

Subject: Water Supply Interruptions on Cullinan Water Supply Scheme

Magalies Water hereby notifies consumers receiving water supply from Cullinan Water Supply Scheme of envisaged water supply interruptions. This is due to a power supply interruption, which has affected the operation of the raw water pump station, which abstracts raw water into the plant for treatment processes prior to distribution into the bulk network.

Power utility – Eskom, has been made aware and has dispatched a technical team which is currently on site to resolve the supply interruption, affecting the raw water pump. While current reservoir levels are high, there is a high possibility of water supply interruptions, as usage of potable water continues while abstraction is suspended. Customers are encouraged to use water sparingly during this period, in order to prevent prolonged water supply interruptions.

Updates will be communicated once and when new information becomes available. Magalies Water apologizes for the inconvenience that this may cause.
